# 1. Product Overview

## 1.1 HX5

## 1.2 LX5

## 2. Installing your Device

### 2. 1 Hardware Installation

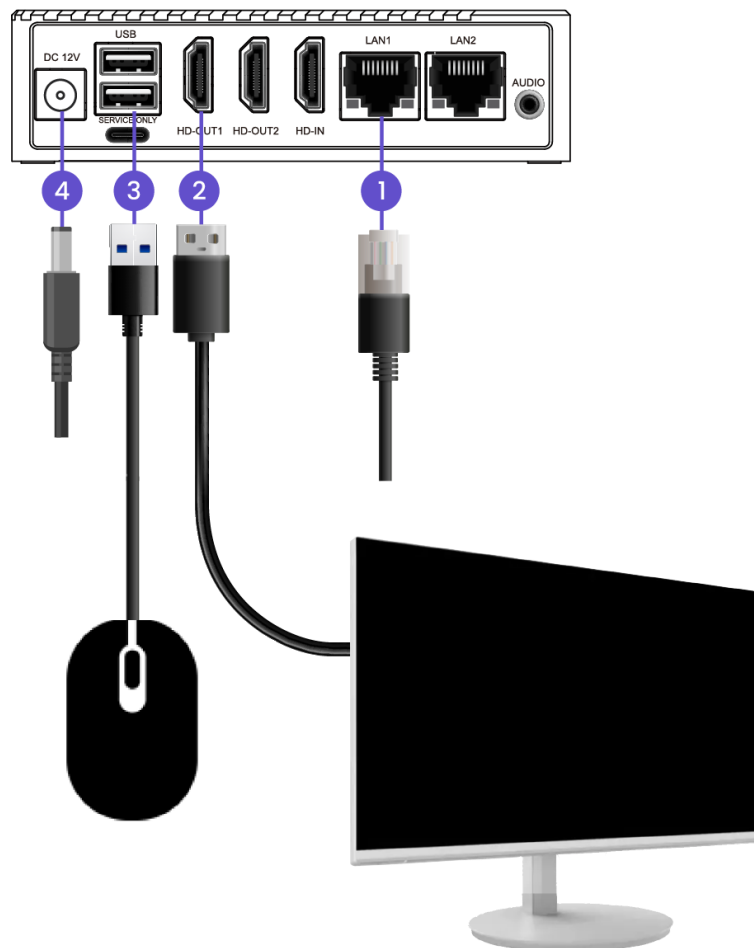

**Step 1** Connect an Ethernet cable from your router or hub to the device's LAN port. (By default, device will receive an IP address from a DHCP server.)

**Step 2** Connect the HDMI cable from the device to your screen.  
(The default resolution will be the screen's native resolution.)

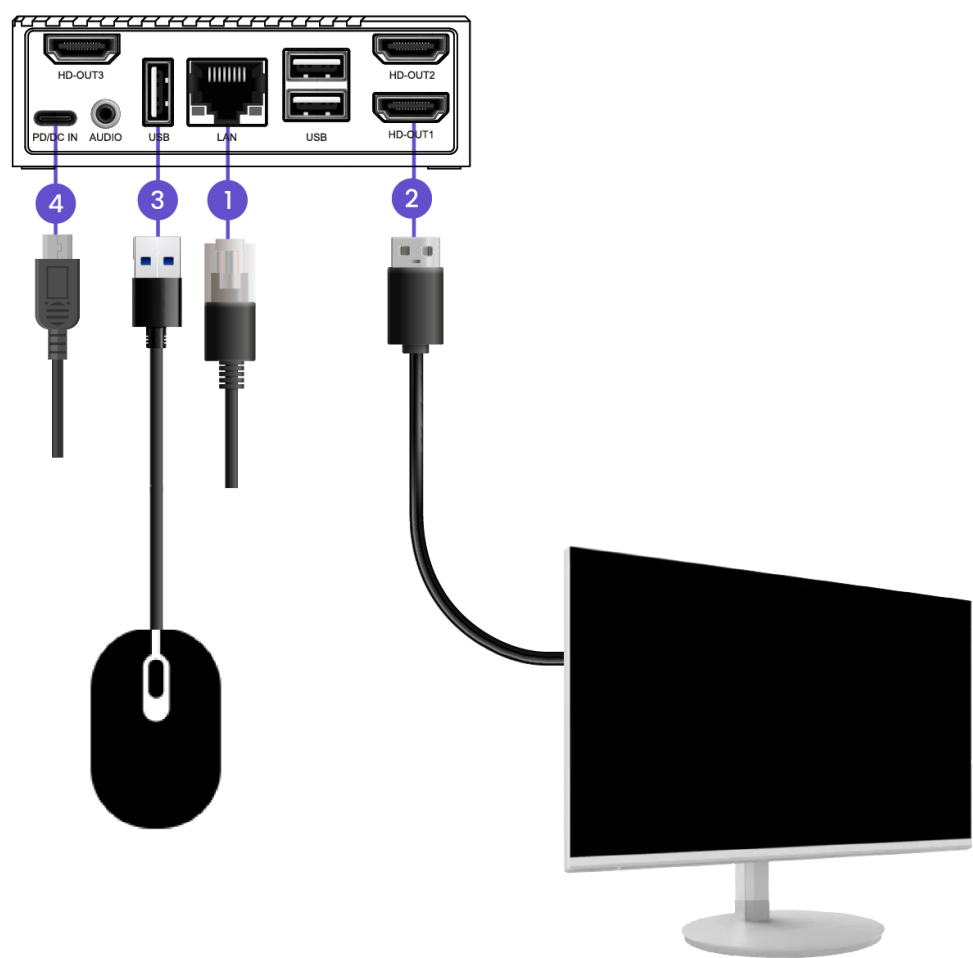

**Step 3** If you'd like to configure system settings directly from the device, please connect a mouse to any of the USB ports.

**Step 4** Connect the power adapter to a socket. Device will turn on automatically.

### 3. Network Setup

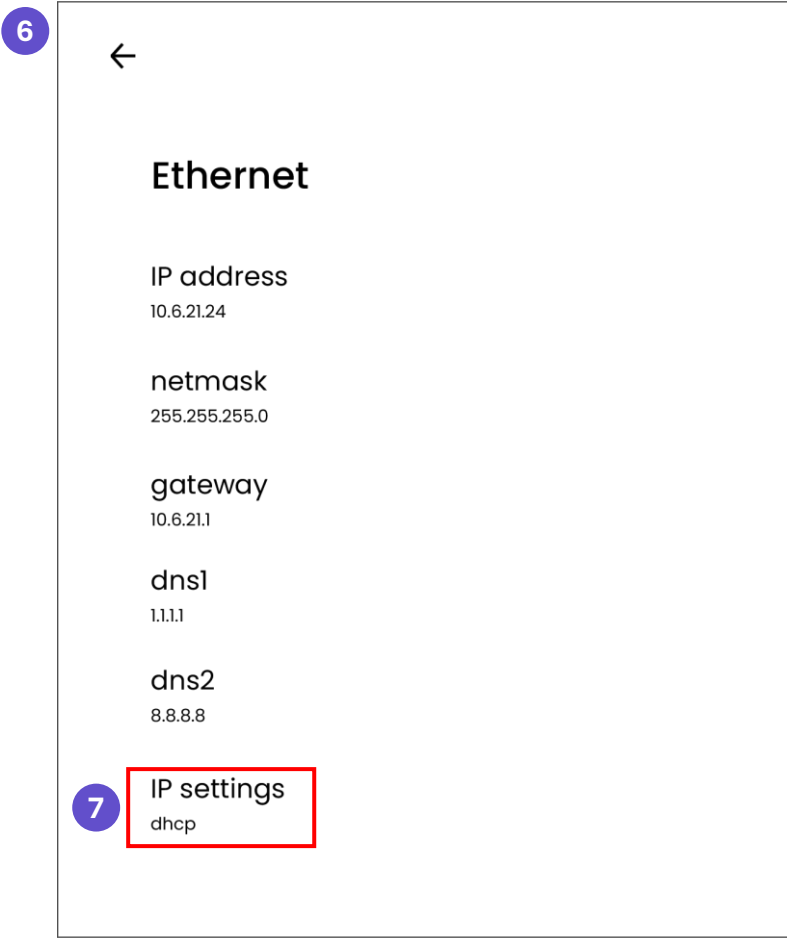

When you move **1** the mouse connected to the device, **2** the device settings appear at the top of the screen.

When you click on **3** network settings, **4** Network & Internet menu appears.

When you click on 5 Ethernet, 6 Ethernet menu appears.

[DHCP (default)]

The device will get an IP address automatically after installation.

[Static IP]

When you click on **7** IP settings and select **8** static, **9** the network settings of this device, such as IP address, netmask, gateway, and DNS will appear. After all inputs are completed, click **10** CONNECT.
